WHAT IS A PASSWORD MANAGER?

A password manager is a service that remembers your passwords, so you don't have to.

In addition to helping you organize and manage your logins, it makes it easy for you to follow best password practices.

WHAT IS LASTPASS?

LastPass is the leading password manager helping over 7 million users worldwide simplify their online life.

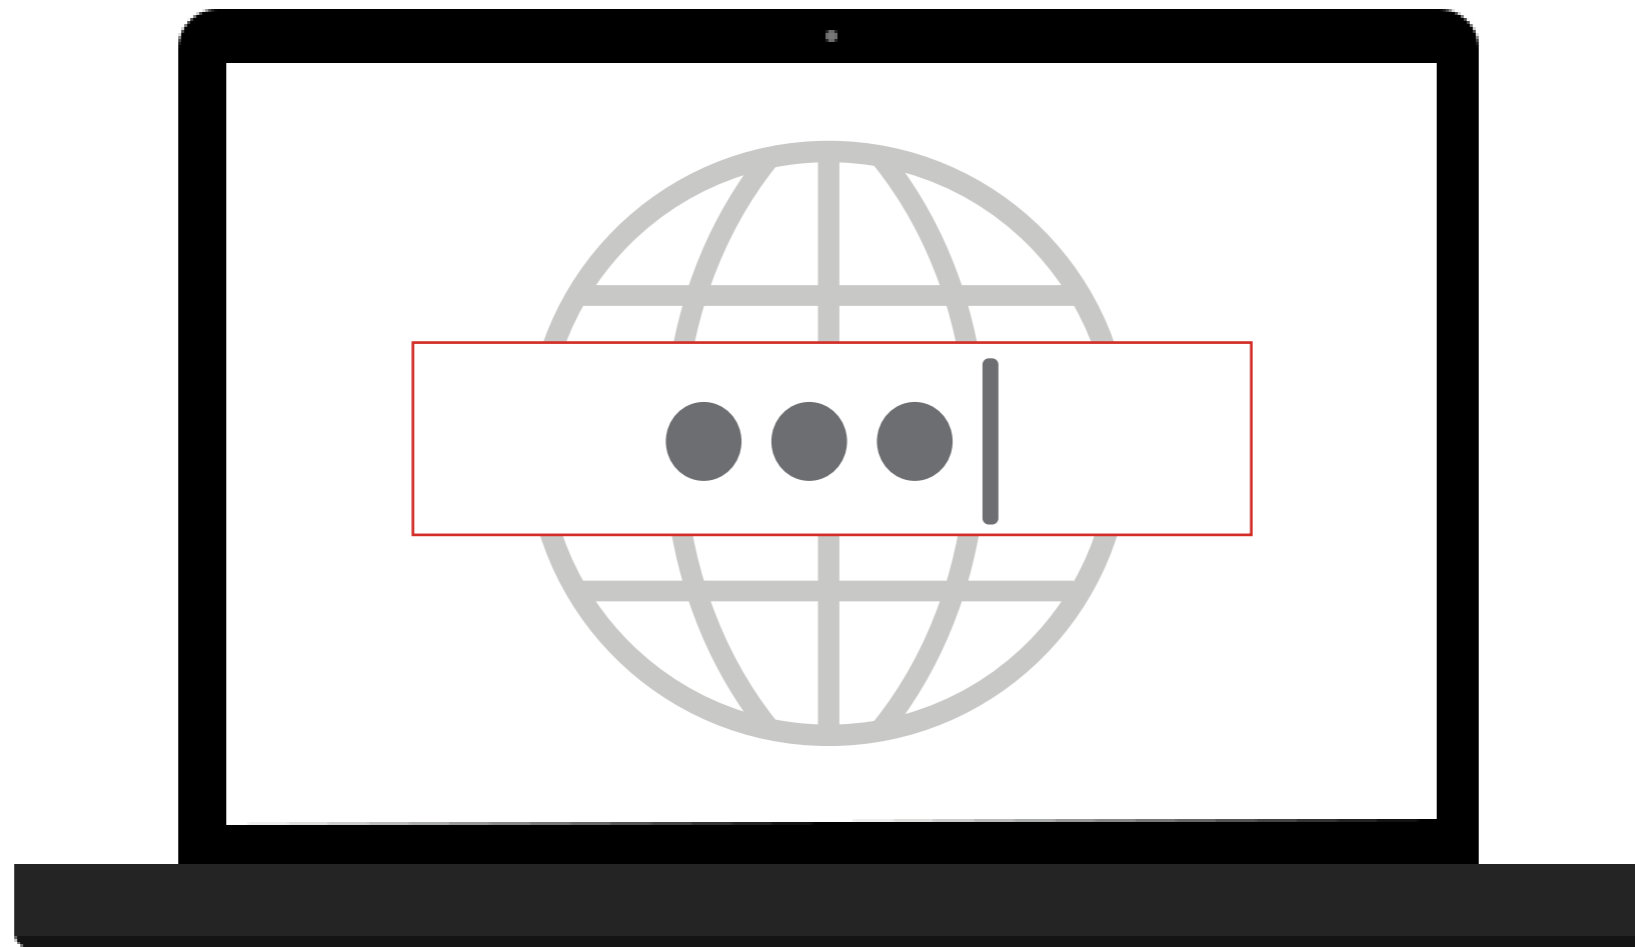

LastPass syncs everywhere with support for all browsers, operating systems, and mobile devices.

Data is encrypted locally and your key is never shared with LastPass. 256-bit AES encryption, one-way salted hashes, and PBKDF2 iterations ensure complete security.

WHY EMPLOYERS CHOOSE LASTPASS

Over 17,000 organizations trust LastPass to strengthen company password practices, protect against data breaches, and achieve regulatory compliance.

GETTING STARTED: ACCEPTING THE INVITE

LastPass...|

LastPass Account Created

Hi, your employer has created a LastPass Enterprise account for you. LastPass is a password management tool that allows you to safely store your everyday passwords behind a single Master Password. LastPass will then automatically log you in to your sites and applications, keeping your data secure while helping you be more productive.

Your username is fan@lastpass.com

Your temporary password is [abc123](#)

To get started, [click here](#) to reset your password.

[Click here](#) for a 5-minute introductory tutorial. Other helpful screencasts can be found at:
https://lastpass.com/support_screencasts.php.

Thanks,
The LastPass Team

THIS EMAIL WAS AUTO-GENERATED - DO NOT REPLY TO THIS EMAIL

Your security is our priority.
Never share your Master Password with anyone, including us!

CREATE YOUR MASTER PASSWORD

A strong master password is key for your security.

Complete this form to reset your LastPass master password

Email cidferrara+emailest1@gmail.com

Old Password

New Master Password

Re-Enter Master Password

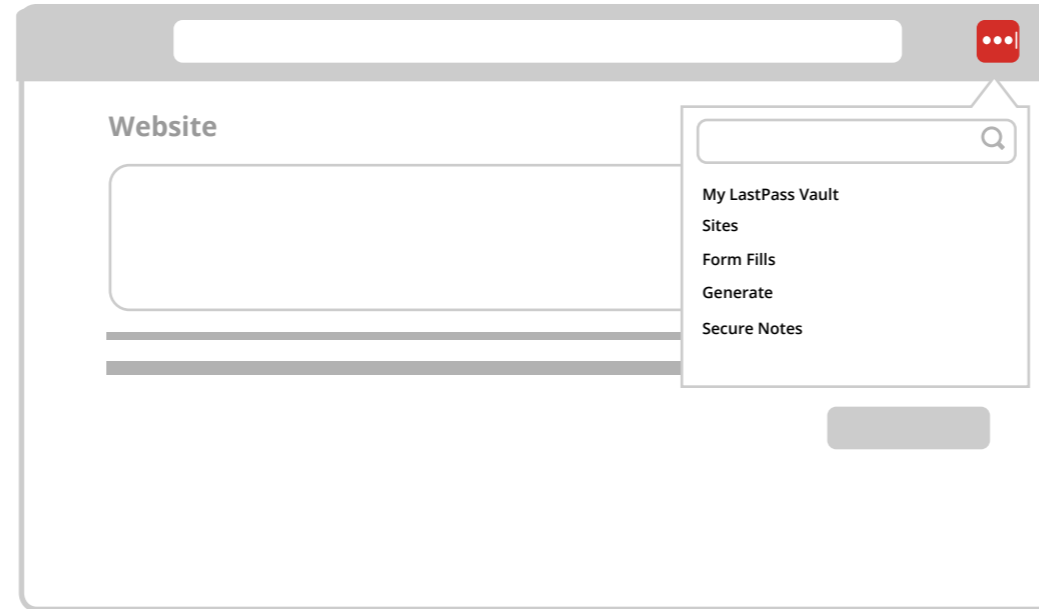

Password Reminder

Save Master Password

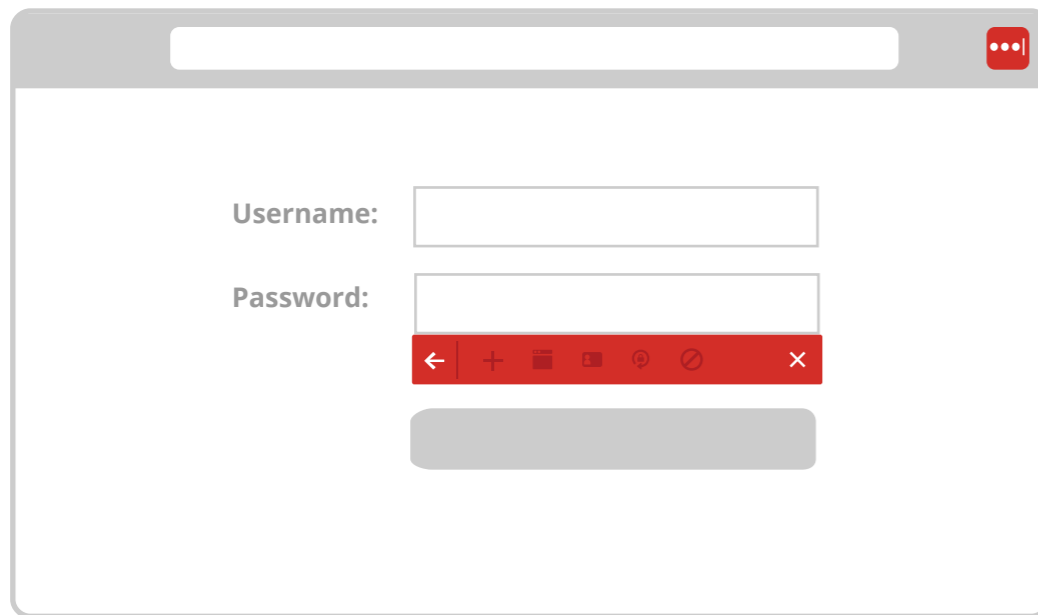

Your password should include at least 15 characters combining numbers, symbols, and letters, without using dictionary-based words.

THE LASTPASS ECOSYSTEM

The LastPass Extension

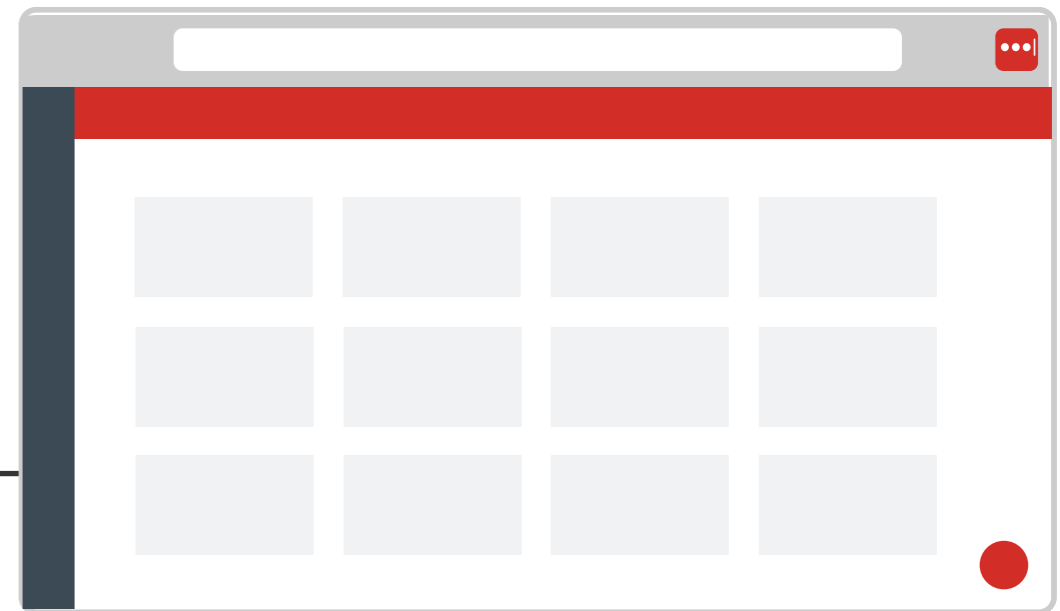

In-Field Icon

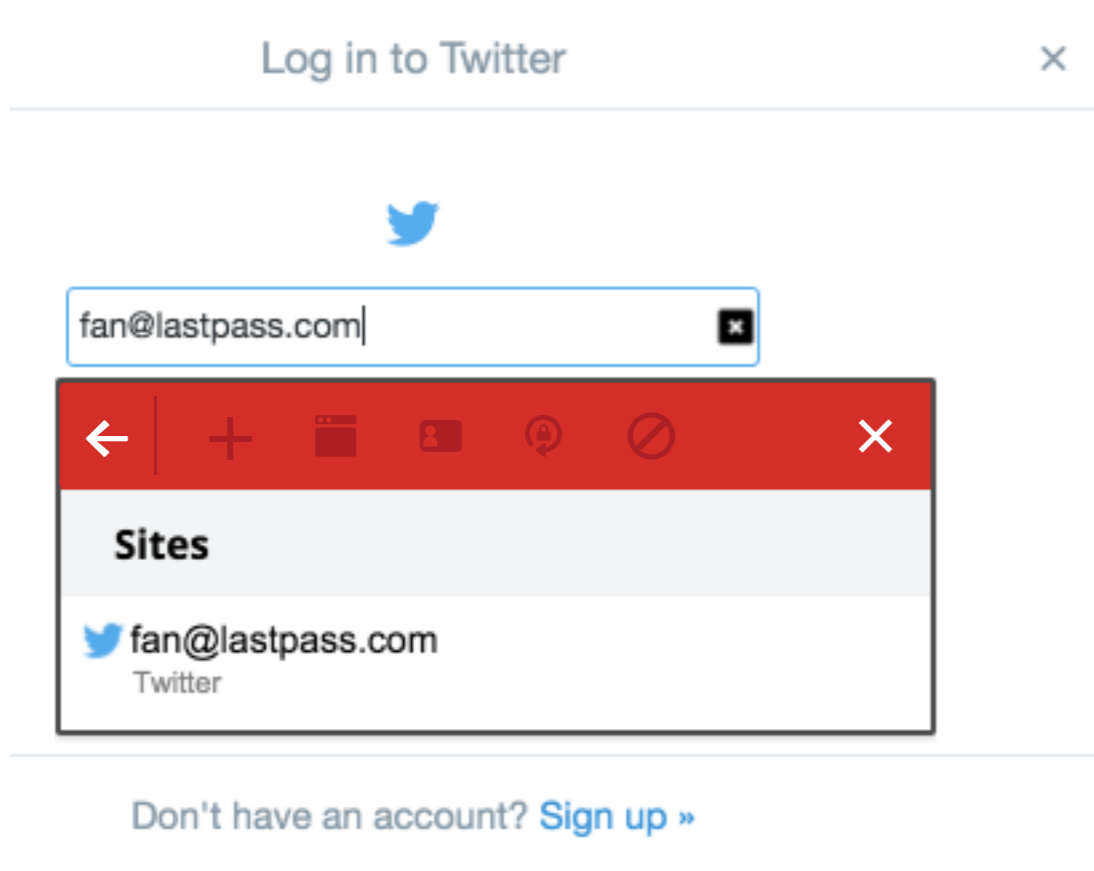

LastPass...|

Your LastPass Vault

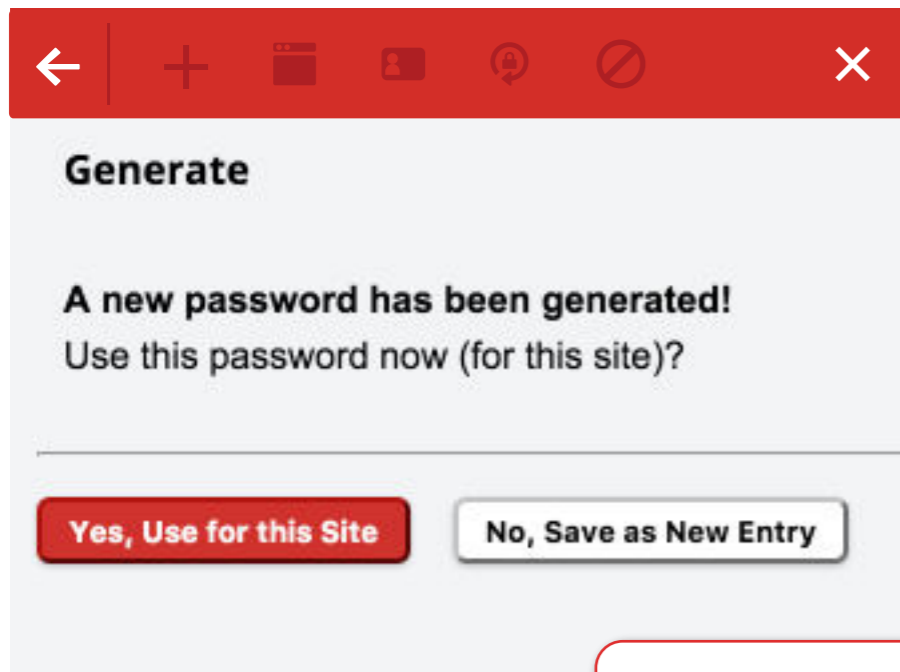

LASTPASS SAVES AND FILLS LOGINS FOR YOU

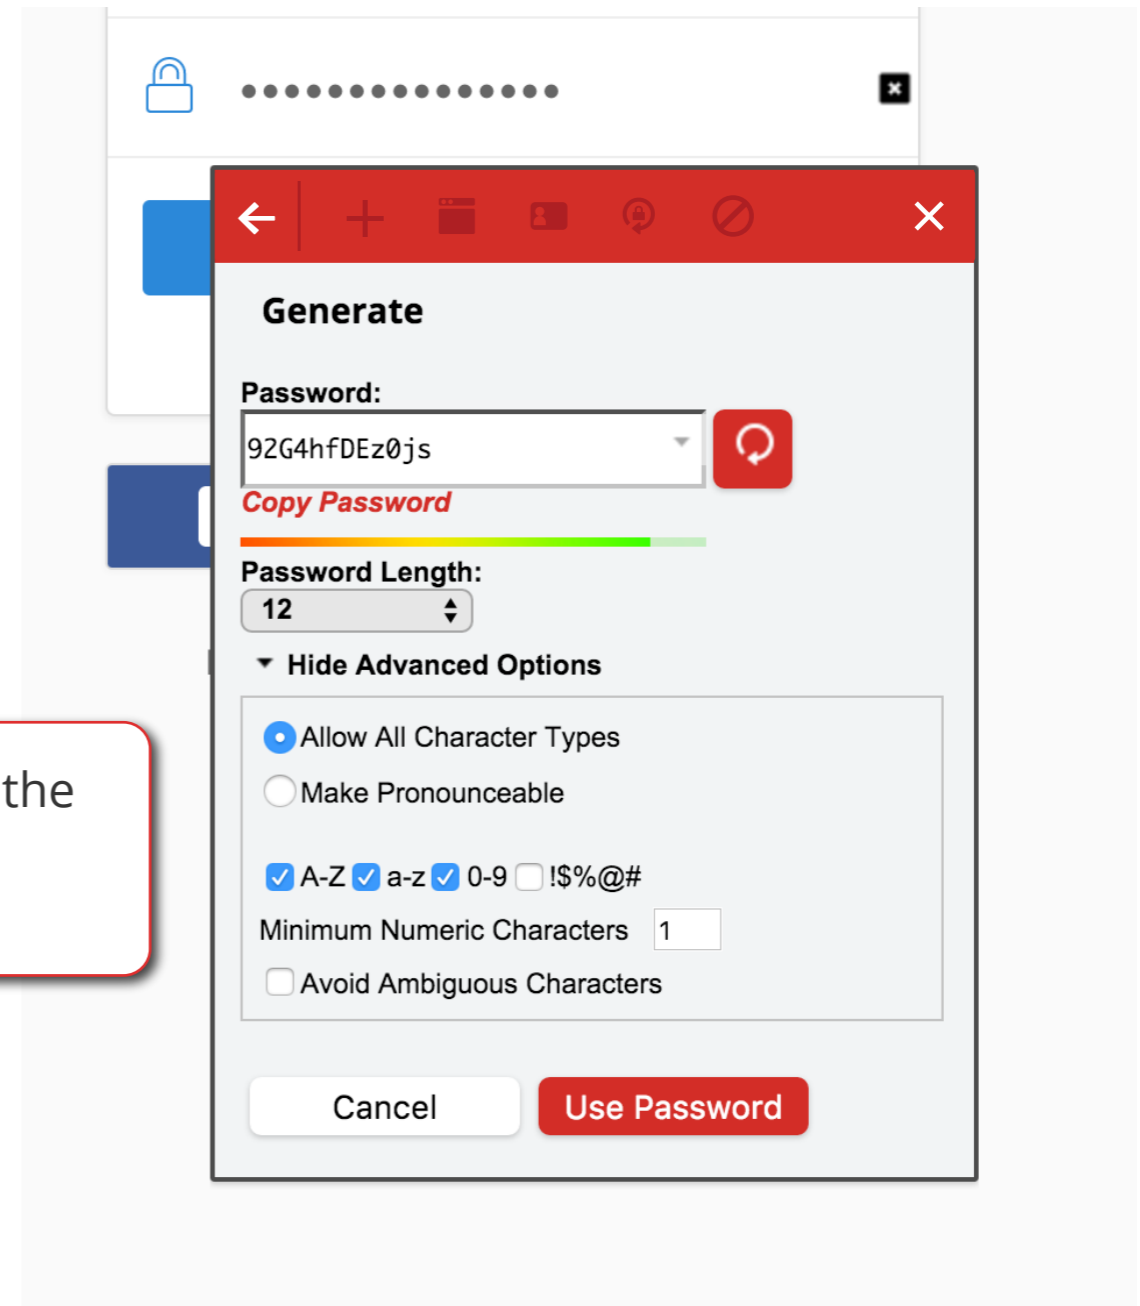

Use the LastPass in-field icon to save a new login or to select from the accounts you've already stored.

GENERATE NEW PASSWORDS

Create secure, unique passwords when registering for a new account or updating the password for an old login.

Use the in-field icon to open the generator and save the new password to your vault.

FILL IN ONLINE FORMS FASTER

Save time and create a secure form fill profile for simplified checkout and registration.

The image shows a 'Sign Up' form with fields for 'First name' and 'Last name'. A LastPass extension window is open over the form, displaying a list of saved profiles under the heading 'Form Fills'. The profiles listed are: Corporate AmEx, Home Shipping Address, My Primary Profile, Shopping Credit Card, Work Credit Card, and Work Shipping Address. Below the list are options to 'Add Profile', 'Add Credit Card', 'Clear Forms', and 'Choose Profile and Credit Card'. A red callout box at the bottom of the image contains the text: 'From the LastPass extension, open Form Fills to add or edit profiles. Click the in-field icon to select a profile and instantly fill a form.'

The image shows the 'Add Form Fill' dialog box in the LastPass extension. The title bar reads 'Add Form Fill' and 'LastPass ****'. The dialog has several sections:

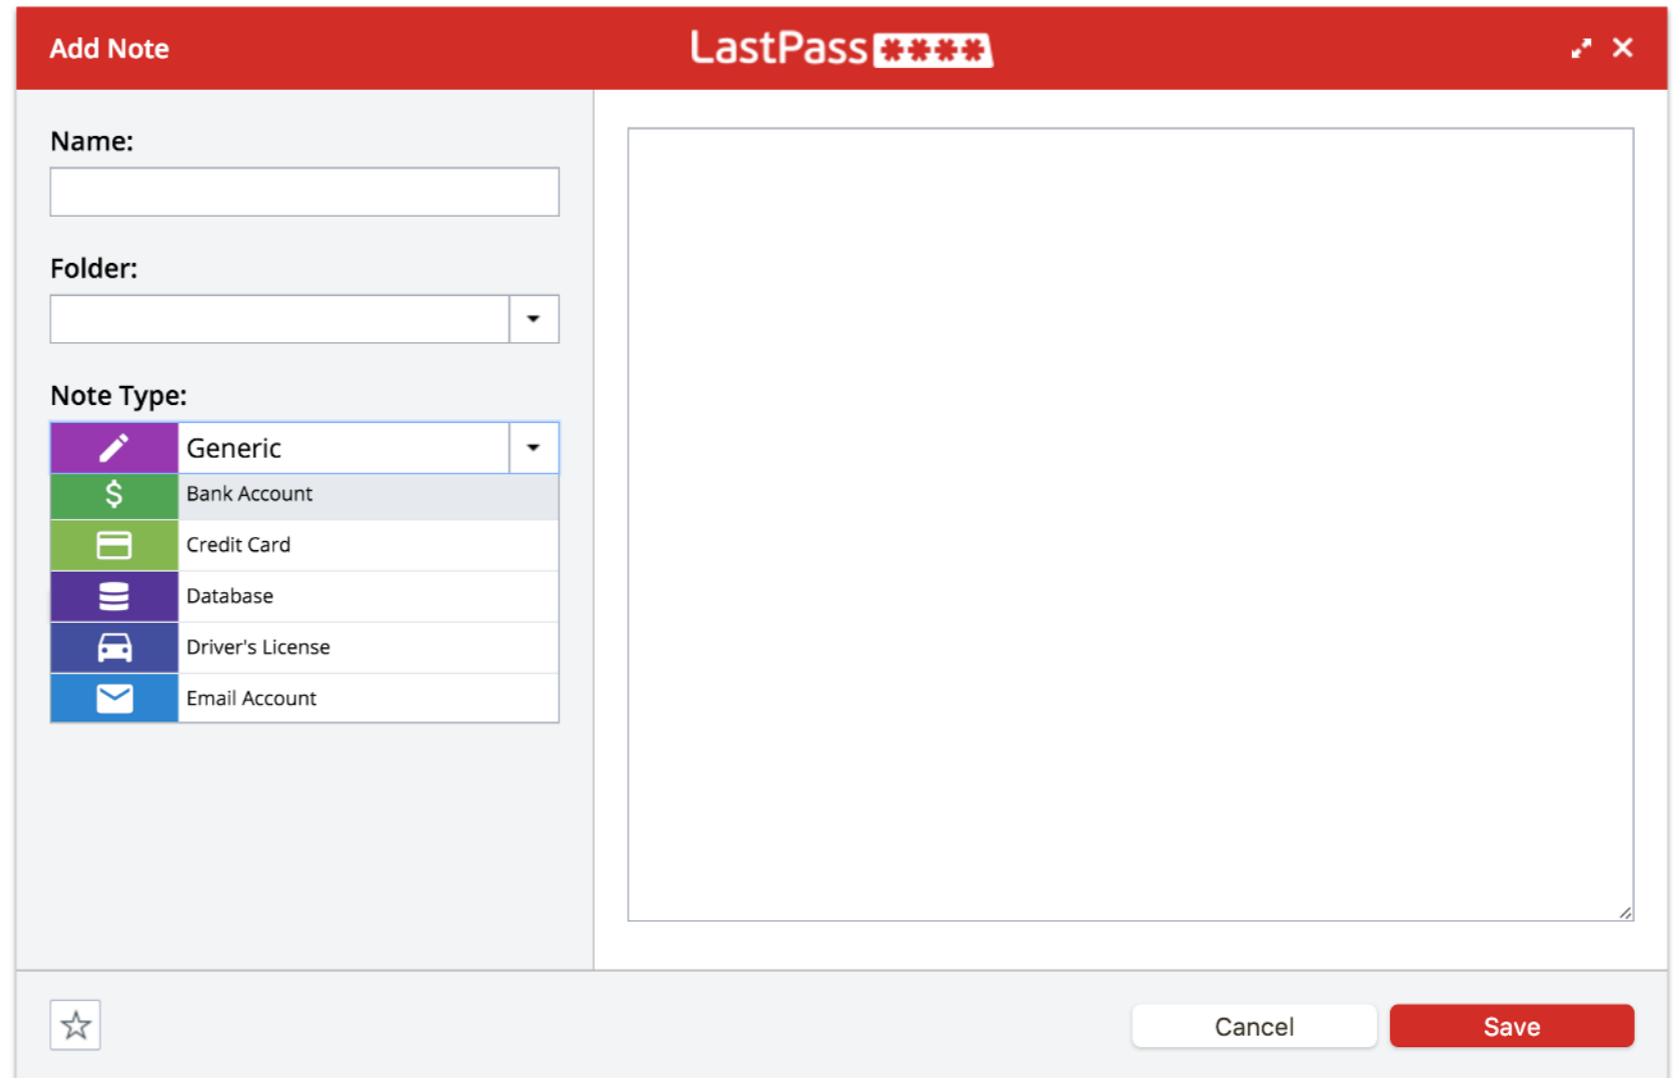

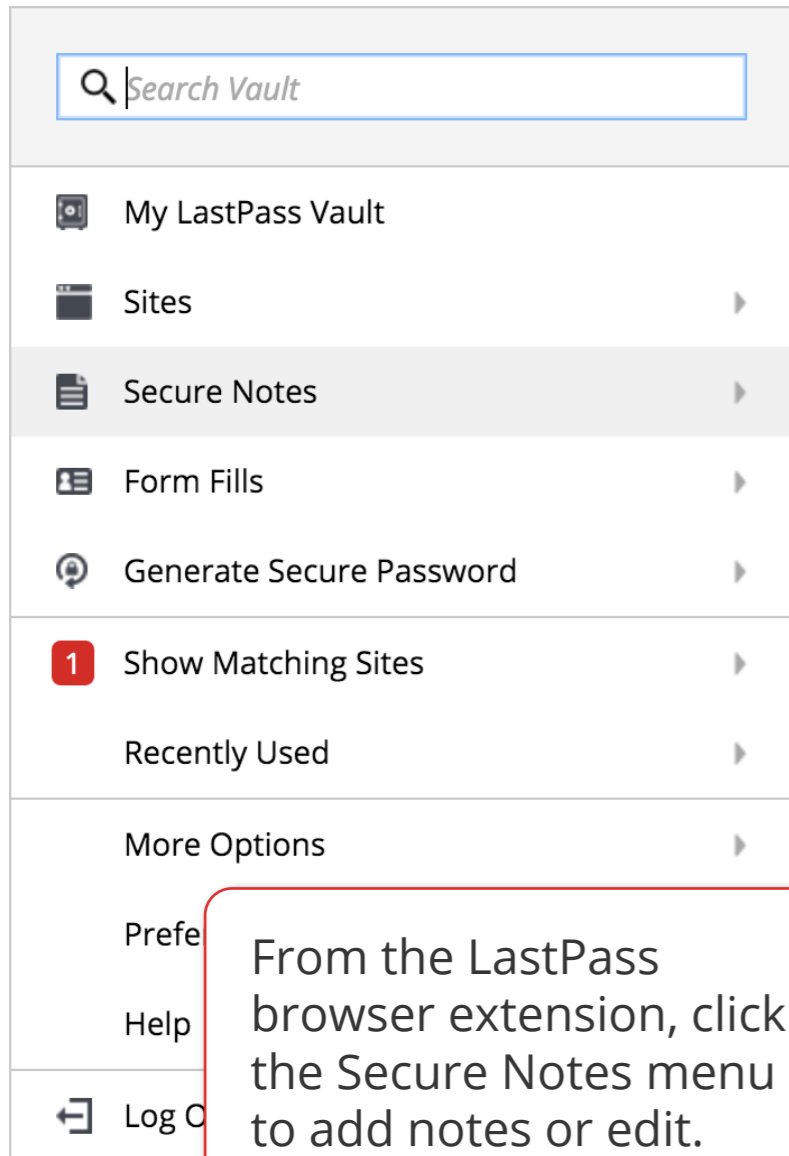

- Name:** A text input field.
- Type:** A dropdown menu set to 'Generic'.
- Language:** A dropdown menu set to 'English'.
- Personal:** A list of categories on the left: Address, Contact, Credit Card, Bank Account, Custom fields, Notes, and a checkbox for 'Enable Free Credit Monitoring'. An 'Advanced Settings' section is also visible.
- Form Fields:** A table of input fields on the right:

Title	<input type="text"/>
First name	<input type="text"/>
Middle name	<input type="text"/>
Last name	<input type="text"/>
Username	<input type="text"/>
Gender	<input type="text"/>
Birthday	<input type="text"/> <input type="text"/> <input type="text"/>
Social security number	<input type="text"/>

At the bottom right, there are 'Cancel' and 'Save' buttons.

STORE ANYTHING IN SECURE NOTES

Use Secure Notes to securely save things like WiFi logins, membership cards, and PIN codes.

TAKE THE LASTPASS SECURITY CHALLENGE

The Security Challenge identifies weak, duplicate, and potentially breached passwords.

Detailed Results

How it works

From the LastPass browser extension, select Tools and run the Security Check.

MULTIFACTOR AUTHENTICATION

Add another layer of security to your LastPass account with multifactor authentication to protect against keyloggers, phishing, and other threats.

Edit Settings ✕

General Security Equivalent Domains Never URLs **Multifactor Options** Mobile Devices Trusted Computers URL Rules

Choose a multifactor option: YubiKey Google Authenticator Toopher Duo Security Transakt Salesforce# RSA SecurID

LastPass can be configured to work with Google Authenticator. Google Authenticator is a secure, easy to use, two-factor authentication application for your mobile device that is immune from replay-attacks, man-in-the-middle attacks, and a host of other threat vectors.

Google Authenticator makes LastPass more secure and easier to use.

To install the Google Authenticator application on your mobile device, visit [GOOGLE AUTHENTICATOR!](#)

To associate Google Authenticator with your account, scan the barcode below with your Google Authenticator application.

[Click here to display your barcode](#)

[Click here if you're unable to scan the barcode \(for example if you're using the BlackBerry application, or a device without a camera\).](#)

Google Authenticator Authentication Help

Permit Offline Access Help

PLEASE NOTE: If you choose to permit offline access, your data may temporarily be available in offline mode before you complete multifactor authentication. [Click here to learn more about this.](#)

[Click here to regenerate your Google Authenticator key \(for example if you lost your Google Authenticator device\).](#)

SHARED LOGINS & FOLDERS

Conveniently share access to logins across functional teams with Shared Folders.

Create New Shared Folder LastPass

A Shared Folder will appear in the vault as Shared-'Folder Name'.

In the vault, drag-and-drop Sites or Secure Notes to add them to the folder. You can convert an existing folder to a Shared Folder at any time, or edit the folder to a Shared Folder.

Folder Name:

Cancel Create

Select "Manage Shared Folders" in the vault to create, assign, and customize permissions to folders.

LINKING YOUR PERSONAL ACCOUNT

Enterprise accounts are for company data only. For a more convenient browsing experience, you can link your personal account. Your personal data remains private and cannot be accessed by your employer.

Link Personal Account ×

If you have an existing personal LastPass account, you can link it with your current enterprise account so that the accounts will remain separate but you will be able to easily access both through a single login.

Please enter the credentials of your personal account and the association will be made. Your personal account will appear as a sub-folder in your enterprise account.

If you do not have a personal account yet: [Create a personal account first](#)

Personal Account Email

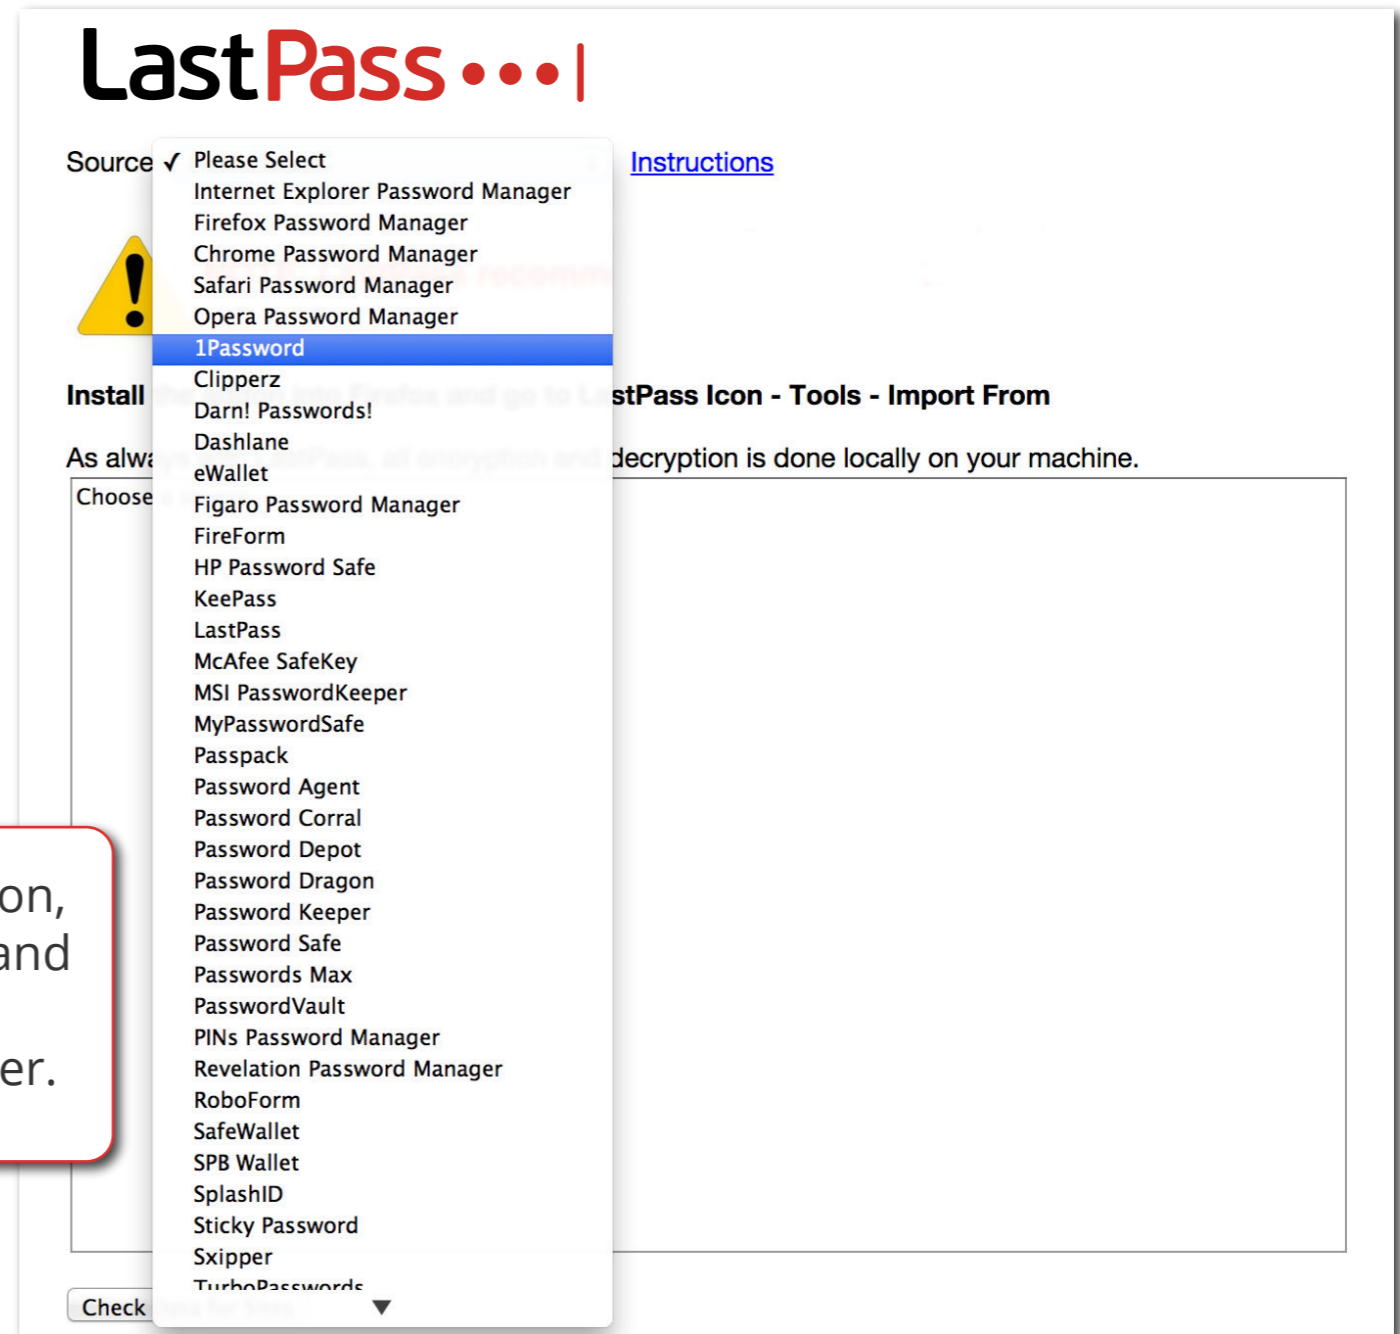

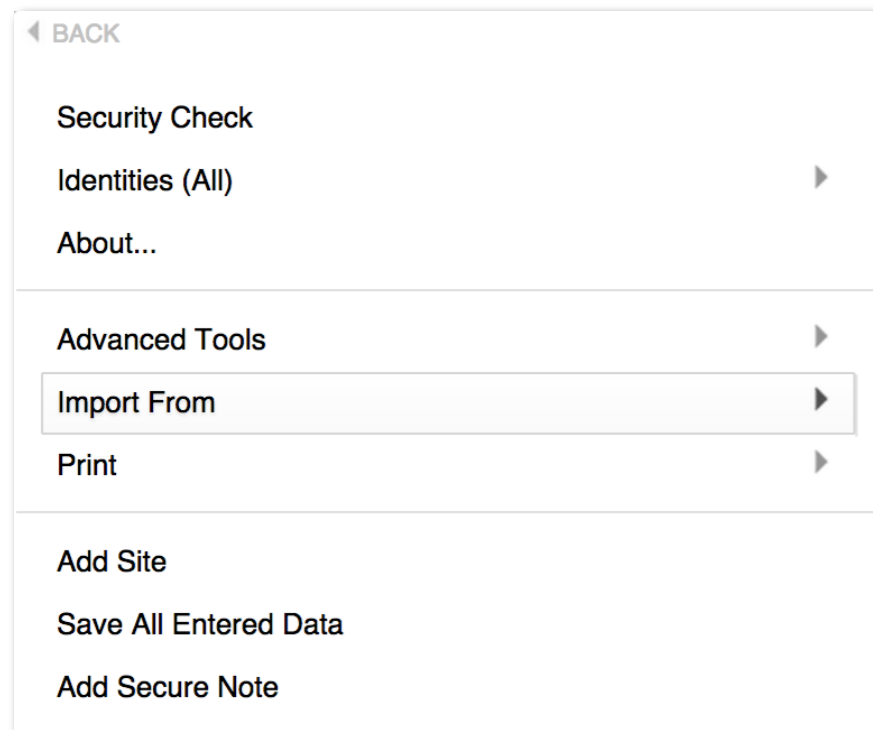

Personal Account Master Password

[Link Account](#)

Open your LastPass vault and click 'Link Account' in the Action menu on the left. Once linked, the personal account shows as a folder in your vault.

IMPORTING LOGINS INTO LASTPASS

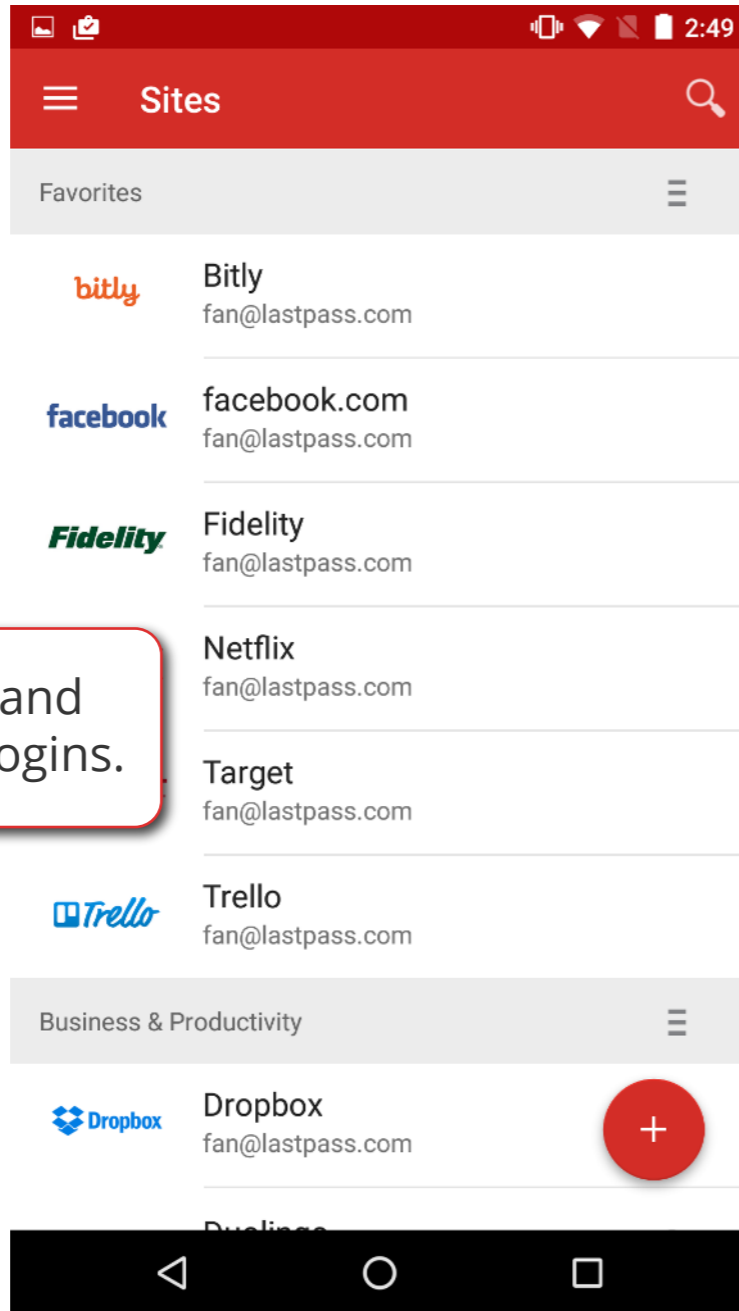

Already using a password manager? Importing existing logins into LastPass is easy.

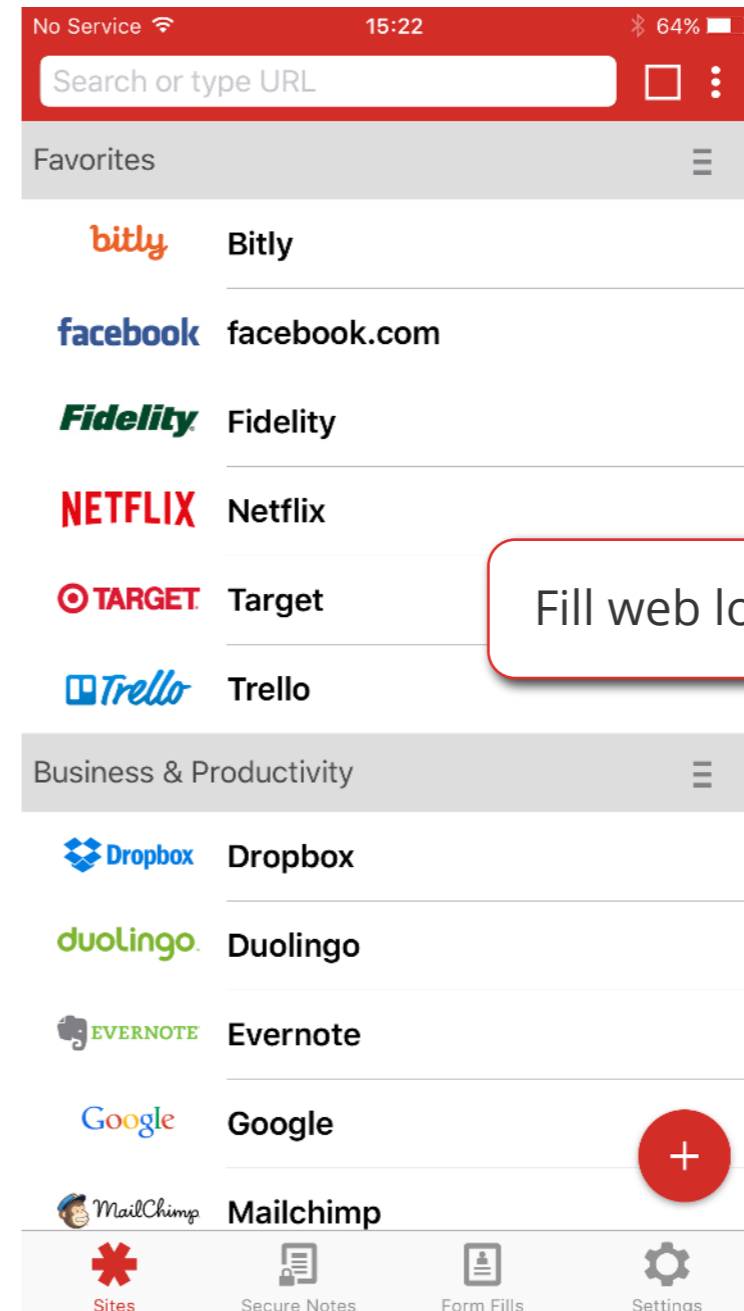

Open the LastPass extension, select Tools, then Import, and follow the steps for your previous password manager.

LASTPASS ON THE GO

Download the LastPass mobile apps for Android, iOS, and other smartphones to access your vault and login to sites. View, edit, add, and fill passwords with the mobile app.

Fill app logins and Chrome web logins.

Fill web logins in Safari.

LOGIN TO CLOUD APPS WITH LASTPASS SAML

LastPass Enterprise works behind-the-scenes to authenticate cloud apps.

The screenshot displays the LastPass Enterprise vault interface. On the left is a dark sidebar with navigation options: Collapse, Sites, Secure Notes, Form Fills, Sharing Center (with a notification badge), Security Challenge (95%), Emergency Access, Account Settings, and More Options. The main content area has a red header with the LastPass logo, a search bar, and the user email 'fan@lastpass.com'. Below the header, the 'Sites' section is active, showing 'Apps Assigned to Me (6)'. A callout box with a red border points to this section, containing the text: 'You can find your cloud app logins in the “Apps Assigned to Me” folder in your vault.' The apps listed are: AirBnB, Amazon, Evernote, Facebook, and Pocket. Below these is a 'Banking and Finance (3)' section, which is marked as 'Read Only • Shared Folder' and contains Capital One, Fidelity, and Bank of America. A red '+' button is visible in the bottom right corner of the app grid.

YUBIKEY AUTHENTICATION

Enable Yubikey to further protect your LastPass account against keyloggers and other hacking attempts.

General Security Equivalent Domains Never URLs **Multifactor Options** Mobile Devices Trusted Computers URL Rules

Choose a multifactor option: YubiKey Google Authenticator Toopher Duo Security Transakt Salesforce# RSA SecurID

1. INSERT YUBIKEY INTO USB PORT.
2. CLICK INSIDE TEXT FIELD.
3. DEPRESS BUTTON ON YUBIKEY.

1101101010110101
0101011010101011
1010110101011001

LastPass can be configured to work with YubiKeys made by Yubico. YubiKeys are a secure, easy to use, two-factor authentication device that are immune from replay-attacks, man-in-the-middle attacks, and a host of other threat vectors.

YubiKeys make LastPass more secure and easier to use.

To get your YubiKey, visit [GET A YUBIKEY!](#)

YubiKey Authentication: Disabled
Permit Mobile Device Access: Allow
Permit Offline Access: Allow

To associate a YubiKey with your account, give focus to one of the below input boxes and press your YubiKey.
To disassociate a YubiKey with your account, clear the entire value of the input box.

Key #1:
Key #2:
Key #3:
Key #4:
Key #5:

To enable Yubikey on your account, click on the LastPass extension, 'preferences', 'account settings', 'launch account settings'.

ACCOUNT RECOVERY

It is very important that you remember your LastPass master password. If you forget your password, there may be a few options available to recover your account.

FORGOT PASSWORD?

Visit LastPass.com/Forgot.php to start the account recovery process.

Enter your email address, and we'll email your password hint to you.
